# Hein Thet Zaw

Frontend Developer (React.js/Next.js)

## ABOUT ME

I'm a dedicated software engineer with a strong focus on frontend development. I build responsive, accessible, and high-performance web applications using tools like React and Next.js. I follow best practices and collaborate with designers to create clean, user-friendly interfaces.

I also have solid backend experience with Node.js (Express.js, Nest.js) and databases like PostgreSQL, MySQL, and MongoDB. I've developed scalable APIs and server-side logic to support dynamic, data-driven applications.

## EXPERIENCE

Freelance Developer | 2023 – 2024

### Freelance Developer

- Engaged in community challenge projects, delivering real-world solutions within tight deadlines.
- Designed a custom portfolio website for a client to improve their online visibility.
- Developed responsive and accessible user interfaces utilizing React.js and Tailwind CSS.
- Created and integrated backend services with Node.js along with MongoDB/PostgreSQL.

Next.js Developer | Aug 2024 – Present

### ShopDoora Co., Ltd

- Maintained and debugged live React.js old projects for stability and performance.
- Built scalable, SEO-friendly LMS and e-commerce apps with Next.js, React.js.
- Deployed and updated React/Next.js sites to staging and production servers.
- Developed backend APIs for a hospital site using Node.js and Express.
- Worked with designers, QA, and backend teams to refine and deliver features.
